

2022 Senate At-A-Glance

This list of potential candidates for the 2022 elections is highly speculative and contains names that have been mentioned as either publicly or privately considering candidacies, or worthy of consideration as candidates or recruiting prospects by the parties or interest groups. The numerical key indicating our assessment of each person's likelihood of running is obviously important, given the "long and dirty" nature of this list, which will be updated each week.
